

AI STRATEGY YOUR MISSION CAN OWN.

Fourth Paradigm Consulting helps government and public-sector leaders see through the fog of AI hype, weigh risk against mission opportunity, and choose a defensible path forward. We bring technical fluency and executive judgment to decisions about priorities, governance, workforce readiness, and responsible adoption.

CORE COMPETENCIES

01

AI RISK & OPPORTUNITY AUDIT

A fiduciary-grade assessment of mission exposure, strategic advantage, governance gaps, and the decisions leaders must own before AI efforts scale.

02

STRATEGIC AI ROADMAPS

A clear route from reactive experiments to enduring capability: priorities, use cases, decision gates, governance, success measures, and partner-ready next steps.

03

EXECUTIVE COACHING & WORKFORCE RESILIENCE

Private advisory for senior leaders plus role-based education that builds shared language, sound judgment, and confidence across the human system.

SELECTED PAST PERFORMANCE

Fourth Paradigm Consulting supported Chieftain Elite Solutions in developing and delivering generative AI training for an Army Test and Evaluation Command (ATEC) workforce development program serving Army civilian and technical personnel. Josh Kuehl served as lead facilitator and curriculum designer, developing the coursework and combining foundational AI instruction with hands-on application in the tools and workflows available to participants.

TESTIMONIAL

"We didn't need another AI demonstration. We needed a clear view of where to act, where to wait, and what to protect. Josh gave us that."

— JOHN MCGRAIL

DIFFERENTIATORS

- + 11 years of Army leadership, including combat service in Iraq
- + 20+ years designing data systems and building AI and deep-learning models
- + Fluent translation between technical architecture and executive judgment
- + Independent strategic guidance centered on mission, risk, and accountable decisions
- + Nationwide remote, on-site, and hybrid delivery

WHERE WE CREATE VALUE

- + Executive AI strategy and decision support
- + Risk, opportunity, and readiness assessment
- + Governance and use-case prioritization
- + Independent evaluation of pilots and vendor claims
- + Leadership education and workforce resilience
